PROFILE

Aspiring .NET Developer and BCA VII semester student with experience building small projects using C# and the .NET framework. Familiar with developing RESTful APIs and desktop applications using Windows Forms. Possess basic knowledge of AI/ML concepts and currently expanding my skills in .NET development and related technologies.

EDUCATION

Bachelor of Computer Applications (BCA)

Kantipur City College (KCC), Purbanchal University

2022 – Present

VII Semester

TECHNICAL SKILLS

- **Languages:** C#, Python, Java, C, C++
- **Frameworks & Technologies:** .NET / .NET Core, ASP.NET Web API, FastAPI
- **Backend Development:** Building RESTful APIs, CRUD operations, API integration, JSON handling
- **Desktop Development:** Windows Forms (WinForms) UI development
- **Web Development:** HTML, CSS, JavaScript
- **AI & IoT:** Basic AI/ML concepts, Intent Recognition, Recommendation Systems, ESP32 integration

PROJECTS

PharmaCare - Medicine Management System | C#, .NET, SQL

- Developed a comprehensive desktop application using **Windows Forms (WinForms)** for medicine stock and billing.
- Implemented full **CRUD operations** to track inventory, manage medicine expiry, and automate bill generation.
- Designed efficient backend logic using **C#** to handle real-time database updates and reporting.

SmartSchool - Management System | C#, .NET

- Engineered a school management tool for teacher attendance, leave tracking, and scheduling using the **.NET framework**.
- Focused on creating a functional and user-friendly desktop interface while ensuring data integrity.

MiQ - Desktop AI Assistant | Java Swing, FastAPI

- Built a desktop assistant featuring voice-triggered commands and **API integration** for system-level controls.
- Managed data communication between a desktop frontend and a FastAPI backend using **JSON handling**.

FoodPrint - Web Application | Full Stack

- Developed a personalized recipe finder with social features and admin controls using modern web technologies.

Movie Ticket Booking System | C++

- Terminal-based system focused on algorithmic seat selection and booking logic.

KEY HIGHLIGHTS

- Proficient in **C#** and building functional applications within the **.NET ecosystem**.
- **Familiar with API development**, including RESTful architecture and JSON-based data exchange.
- Solid understanding of Object-Oriented Programming (OOP) principles and database management.
